JOURNAL OF THEORETICAL BIOLOGY

Chief Editor: J. F. DANIELLI
Associate Editor: L. WOLPERT

Editorial Board:
E. A. BARNARD
H. BREMERMANN
M. CALVIN
J. D. COWAN
N. GOEL
B. GOODWIN
J. MAYNARD SMITH
E. W. TAYLOR
M. YČAS
J. Z. YOUNG

VOLUME 60

July to August 1976

ACADEMIC PRESS
London New York San Francisco

Printed in Great Britain

Contents of Volume 60

Number 1, July 1976

KITAYAMA, H. P. and FUKUTOME, H., A Molecular Orbital Theoretical Study on the Acid-base Property and Reactivity of the Charge Relay System in α-Chymotrypsin 1

GILLESPIE, C. J., Towards a Molecular Theory of the Nerve Membrane: Inactivation 19

WINKELHAKE, J. L., A Dynamic Continuum Model for Molecular Regulation of the Humoral Immune Response 37

WERBER, M. M., The Role of Metal Ions in the Mechanism of Action of Hydrolytic Metalloenzymes: Carbonic Anhydrase 51

RANDOLPH, M. L., Degradation of DNA in *Haemophilus influenzae* Cells After X-ray Irradiation. II. Comparison With Theoretical Models. 59

ELLIS, J. E., WIENS, J. A., RODELL, C. F. and ANWAYS, J. C., A Conceptual Model of Diet Selection as an Ecosystem Process . 93

LEVY, W. B., HAYCOCK, J. W. and COTMAN, C. W., Membrane Permeability and Receptor Function. 109

BRAILSFORD, J. D., KORPMAN, R. A. and BULL, B. S., The Red Cell Shape from Discocyte to Hypotonic Spherocyte—A Mathematical Delineation Based on a Uniform Shell Hypothesis 131

PURVES, R. D., Current Flow and Potential in a Three-dimensional Syncytium 147

RUDICH, S. W., WADE, J. B. and DISCALA, V. A., Theoretical Study of Flow, Pressure and Solute Concentration in Double Membrane Systems 163

ROSEN, R., A Note on the Cross-reactivity of Antibodies 177

JOHNSON, M. E. and WU, T. T., Possible Three-dimensional Models for the Polypeptide Backbone Structure of Alamethicin 183

SPERTELL, R. B., A Theoretical Inquiry into the Role of Phospholipids in Membrane Fusion 197

WELLS, B. D., STEWART, T. A. and FISHER, J. R., Interpretation of Nonlinear Steady State Enzyme Kinetics—Cyclic and Mathematical Properties of Cooperative, Second-site and Random Pathway Models 209

ODELL, G. M., A New Mathematical Continuum Theory of Axoplasmic Transport 223

LETTERS TO THE EDITOR

MALCOLM, A. D. B., On Transition States in Enzyme Catalysed Reactions 239

SCHREIBER, G., URBAN, J. and EDWARDS, K., Possible Functions of the Oligopeptide Extension in the Albumin Precursor . . 241

Number 2, August 1976

KURGANOV, B. I., DOROZHKO, A. I., KAGAN, Z. S. and YAKOVLEV, V. A., The Theoretical Analysis of Kinetic Behaviour of "Hysteretic" Allosteric Enzymes. I. The Kinetic Manifestations of Slow Conformational Change of an Oligomeric Enzyme in the Monod, Wyman and Changeux Model 247

KURGANOV, B. I., DOROZHKO, A. I., KAGAN, Z. S. and YAKOVLEV, V. A., The Theoretical Analysis of Kinetic Behaviour of "Hysteretic" Allosteric Enzymes. II. The Dissociating and Associating Enzymic Systems in which the Rate of Installation of Equilibrium between the Oligomeric Forms is Small in Comparison with that of Enzymatic Reaction 271

KURGANOV, B. I., DOROZHKO, A. I., KAGAN, Z. S. and YAKOVLEV, V. A., The Theoretical Analysis of Kinetic Behaviour of "Hysteretic" Allosteric Enzymes. III. Dissociating and Associating Enzyme Systems in which the Rate of Installation of Equilibrium between the Oligomeric Forms is Comparable to that of Enzymatic Reaction 287

LEÓN, J. A., Life Histories as Adaptive Strategies 301

BAKKEN, G. S., A Heat Transfer Analysis of Animals: Unifying Concepts and the Application of Metabolism Chamber Data to Field Ecology 337

FISH, W. W., Ferritin Structure: Possible Models for Apoferritin Subunit Arrangement 385

AIZAWA, Y. and KOBATAKE, Y., A Theory of Self-organization of an Excitable Membrane Formed on the Protoplasmic Droplet Isolated from *Nitella* 393

ANDERSON, N. G., Interactive Macromolecular Sites. I. Basic Theory 401

ANDERSON, N. G., Interactive Macromolecular Sites. II. Role in Prebiotic Macromolecular Selection and Early Cellular Evolution 413

TREISMAN, M., The Evolution of Sexual Reproduction: A Model Which Assumes Individual Selection 421

LARDNER, T. J. and SOLOMON, N., The Determination of Local Cell Membrane Diffusion Coefficients 433

LAMB, C. J. and RUBERY, P. H., Inhibition of Co-operative Enzymes by Substrate-analogues: Possible Implications for the Physiological Significance of Negative Co-operativity Illustrated by Phenylalanine Metabolism in Higher Plants 441

LIN, S. H., Oxygen Diffusion in a Spherical Cell with Nonlinear Oxygen Uptake Kinetics 449

BERNSTEIN, I. S., Dominance, Aggression and Reproduction in Primate Societies 459

LETTERS TO THE EDITOR

STOKES, A. N., Rapid Oxygen Entry into Unperfused Tissue Slices: An Experimental Artefact? 473

GOLD, H. J., Comment on the Letter of A. N. Stokes on Rapid Oxygen Entry into Unperfused Tissue Slices . . . 477

LONGMUIR, I. S., Reply to a Letter to the Editor by A. N. Stokes 479

PONNUSWAMY, P. K. and MANAVALAN, P., Preferred Backbone Conformations of Amino Acid Residues for Solvent Interaction 481

NOVOTNÝ, J., A Note on the Stability of Jerne's Immune Network 487

WICKLER, W., Duetting Songs in Birds: Biological Significance of Stationary and Non-stationary Processes 493

Index to Volume 60

Adaptive strategies, life histories as, 301
Aggression, dominance and reproduction in primate societies, 459
AIZAWA, Y. and KOBATAKE, Y., A theory of self-organization of an excitable membrane formed on the protoplasmic droplet isolated from *Nitella*, 393
Alamethicin, possible three-dimensional models for the polypeptide backbone structure of, 183
Albumin precursor, possible functions of the oligopeptide extension in, 241
Amino acid residues for solvent interaction, preferred backbone conformations of, 481
ANDERSON, N. G., Interactive macromolecular sites. I. Basic theory, 401
ANDERSON, N. G., Interactive macromolecular sites. II. Role in prebiotic macromolecular selection and early cellular evolution, 413
Antibodies, a note on the cross-reactivity of, 177
ANWAYS, J. C. (see ELLIS, J. E.), 93
Apoferritin subunit arrangement, possible models for: ferritin structure, 385
Axoplasmic transport, a new mathematical continuum theory of, 223

Backbone conformations preferred of amino acid residues for solvent interaction, 481
BAKKEN, G. S., A heat transfer analysis of animals: unifying concepts and the application of metabolism chamber data to field ecology, 337
BERNSTEIN, I. S., Dominance, aggression and reproduction in primate societies, 459
Birds, duetting songs in: biological significance of stationary and non-stationary processes, 493
BRAILSFORD, J. D., KORPMAN, R. A. and BULL, B. S., The red cell shape from discocyte to hypotonic spherocyte—a mathematical delineation based on a uniform shell hypothesis, 131
BULL, B. S. (see BRAILSFORD, J. D.), 131

Carbonic anhydrase: the role of metal ions in the mechanism of action of hydrolytic metalloenzymes, 51
Cellular evolution, early, and prebiotic macromolecular selection, role of interactive macromolecular sites in, 413
Charge relay system in α-chymotrypsin, a molecular orbital theoretical study on the acid-base property and reactivity of the, 1
α-Chymotrypsin, a molecular orbital theoretical study on the acid-base property and reactivity of the charge relay system in, 1
Conceptual model of diet selection as an ecosystem process, 93
Continuum theory of axoplasmic transport, new mathematical, 223
Co-operative, second-site and random pathway models, cyclic and mathematical properties of—interpretation of non-linear steady state enzyme kinetics, 209
COTMAN, C. W. (see LEVY, W. B.), 109
Cross-reactivity of antibodies, a note on, 177
Current flow and potential in a three-dimensional syncytium, 147

Degradation of DNA in *Haemophilus influenzae* cells after X-ray irradiation. II. Comparison with theoretical models, 59
Determination of local cell membrane diffusion coefficients, 433
Diet selection as an ecosystem process, a conceptual model of, 93
DiScala, V. A. (see Rudich, S. W.), 163
DNA degradation in *Haemophilus influenzae* cells after X-ray irradiation. II. Comparison with theoretical models, 59
Dominance, aggression and reproduction in primate societies, 459
Dorozhko, A. I. (see Kurganov, B. I.), 247, 271, 287
Double membrane systems, theoretical study of flow pressure and solute concentration in, 163
Duetting songs in birds: biological significance of stationary and non-stationary processes, 493
Dynamic continuum model for molecular regulation of the humoral immune response, 37

Ecosystem process, a conceptual model of diet selection as an, 93
Edwards, K. (see Schreiber, G.) (letter), 241
Ellis, J. E., Wiens, J. A., Rodell, C. F. and Anways, J. C., A conceptual model of diet selection as an ecosystem process, 93
Enzyme catalyzed reactions, on transition states in, 239
Enzymes, co-operative, inhibition by substrate-analogues: possible implications for the physiological significance of negative co-operativity illustrated by phenylalanine metabolism in higher plants, 441
Enzymic systems in which the rate of installation of equilibrium between the oligomeric forms is small in comparison with that of enzymatic reaction, dissociating and associating. The theoretical analysis of kinetic behaviour of "hysteretic" allosteric enzymes. II, 271
Enzymic systems in which the rate of installation of equilibrium between the oligomeric forms is comparable to that of enzymatic reaction, dissociating and associating. The theoretical analysis of kinetic behaviour of "hysteretic" allosteric enzymes. III, 287
Evolution of sexual reproduction: a model which assumes individual selection, 421
Excitable membrane formed on the protoplasmic droplet isolated from *Nitella*, a theory of self-organization of, 393

Ferritin structure: possible models for apoferritin subunit arrangement, 385
Field ecology, unifying concepts and the application of metabolism chamber data to: a heat transfer analysis of animals, 337
Fish, W. W., Ferritin structure: possible models for apoferritin subunit arrangement, 385
Fisher, J. R. (see Wells, B. D.), 209
Fukutome, H. (see Kitayama, H. P.), 1

Gillespie, C. J., Towards a molecular theory of the nerve membrane: inactivation, 19
Gold, H. J., Comment on the letter of A. N. Stokes on rapid oxygen entry into unperfused tissue slices (letter), 477

Haemophilus influenzae cells after X-ray irradiation, degradation of DNA in. II. Comparison with theoretical models, 59
HAYCOCK, J. W. (see LEVY, W. B.), 109
Heat transfer analysis of animals: unifying concepts and the application of metabolism chamber data to field ecology, 337
Humoral immune response, a dynamic continuum model for molecular regulation of, 37
"Hysteretic" allosteric enzymes, the theoretical analysis of kinetic behaviour of. I. The kinetic manifestations of slow conformational change of an oligomeric enzyme in the Monod, Wyman and Changeux model, 247
"Hysteretic" allosteric enzymes, the theoretical analysis of kinetic behaviour of. II. The dissociating and associating enzymic systems in which the rate of installation of equilibrium between the oligomeric forms is small in comparison with that of enzymatic reaction, 271
"Hysteretic" allosteric enzymes, the theoretical analysis of kinetic behaviour of. III. Dissociating and associating enzyme systems in which the rate of installation of equilibrium between the oligomeric forms is comparable to that of enzymatic reaction, 287

Inhibition of co-operative enzymes by substrate-analogues: possible implications for the physiological significance of negative co-operativity illustrated by phenylalanine metabolism in higher plants, 441
Interactive macromolecular sites. I. Basic theory, 401
Interactive macromolecular sites. II. Role in prebiotic macromolecular selection and early cellular evolution, 413
Interpretation of nonlinear steady state enzyme kinetics—cyclic and mathematical properties of co-operative, second-site and random pathway models, 209

Jerne's immune network, a note on the stability of, 487
JOHNSON, M. E. and WU, T. T., Possible three-dimensional models for the polypeptide backbone structure of alamethicin, 183

KAGAN, Z. S. (see KURGANOV, B. I.), 247, 271, 287
KITAYAMA, H. P. and FUKUTOME, H., A molecular orbital theoretical study on the acid-base property and reactivity of the charge relay system in α-chymotrypsin, 1
KOBATAKE, Y. (see AIZAWA, Y.), 393
KORPMAN, R. A. (see BRAILSFORD, J. D.), 131
KURGANOV, B. I., DOROZHKO, A. I., KAGAN, Z. S. and YAKOVLEV, V. A., The theoretical analysis of kinetic behaviour of "hysteretic" allosteric enzymes. I. The kinetic manifestations of slow conformational change of an oligomeric enzyme in the Monod, Wyman and Changeux model, 247
KURGANOV, B. I., DOROZHKO, A. I., KAGAN, Z. S. and YAKOVLEV, V. A., The theoretical analysis of kinetic behaviour of "hysteretic" allosteric enzymes. II. The dissociating and associating enzymic systems in which the rate of installation of equilibrium between the oligomeric forms is small in comparison with that of enzymatic reaction, 271

KURGANOV, B. I., DOROZHKO, A. I., KAGAN, Z. S. and YAKOVLEV, V. A., The theoretical analysis of kinetic behaviour of "hysteretic" allosteric enzymes. III. Dissociating and associating enzyme systems in which the rate of installation of equilibrium between the oligomeric forms is comparable to that of enzymatic reaction, 287

Life histories as adaptive strategies, 301
LIN, S. H., Oxygen diffusion in a spherical cell with nonlinear oxygen uptake kinetics, 449
LONGMUIR, I. S., Reply to a letter to the Editor by A. N. Stokes (letter), 479

Macromolecular sites, interactive. I. Basic theory, 401
Macromolecular sites, interactive. II. Role in prebiotic macromolecular selection and early cellular evolution, 413
MALCOLM, A. D. B., On transition states in enzyme catalysed reactions (letter), 239
MANAVALAN, P. (see PONNUSWAMY, P. K.) (letter), 481
Membrane diffusion coefficients, local cell, the determination of, 433
Membrane fusion, a theoretical inquiry into the role of phospholipids in, 197
Membrane permeability and receptor function, 109
Metabolism chamber data application to field ecology and unifying concepts: a heat transfer analysis of animals, 337
Metal ions in the mechanism of action of hydrolytic metalloenzymes, role of: carbonic anhydrase, 51
Metalloenzymes, hydrolytic, the role of metal ions in the mechanism of action of, 51
Molecular orbital theoretical study on the acid-base property and reactivity of the charge relay system in α-chymotrypsin, 1
Molecular regulation of the humoral immune response, a dynamic continuum model for, 37
Monod, Wyman and Changeux model, the kinetic manifestations of slow conformational change of an oligomeric enzyme in. The theoretical analysis of kinetic behaviour of "hysteretic" allosteric enzymes. I, 247

Nerve membrane, towards a molecular theory of: inactivation, 19
Nitella, a theory of self-organization of an excitable membrane formed on the protoplasmic droplet isolated from, 393
Note on the stability of Jerne's immune network, 487
NOVOTNÝ, J., A note on the stability of Jerne's immune network (letter), 487

Odell, G. M., A new mathematical continuum theory of axoplasmic transport, 223
Oligomeric enzyme in the Monod, Wyman and Changeux model, the kinetic manifestations of slow conformational change of. The theoretical analysis of kinetic behaviour of "hysteretic" allosteric enzymes. I, 247
Oligopeptide extension in the albumin precursor, possible functions of, 241
Oxygen diffusion in a spherical cell with nonlinear oxygen uptake kinetics, 449
Oxygen entry, rapid, into unperfused tissue slices: an experimental artefact?, 473
Oxygen entry, rapid, into unperfused tissue slices, comment on the letter of A. N. Stokes on, 479

Pathway models, co-operative, second-site and random, cyclic and mathematical properties of—interpretation of nonlinear steady state enzyme kinetics, 209
Phenylalanine metabolism in higher plants, possible implications for the physiological significance of negative co-operativity illustrated by: inhibition of co-operative enzymes by sybstrate analogues, 441
Phospholipids in membrane fusion, a theoretical inquiry into the role of, 197
Polypeptide backbone structure of alamethicin, possible three-dimensional models for, 183
Ponnuswamy, P. K. and Manavalan, P., Preferred backbone conformations of amino acid residues for solvent interaction (letter), 481
Possible functions of the oligopeptide extension in the albumin precursor, 241
Prebiotic macromolecular selection and early cellular evolution, role of interactive macromolecular sites in, 413
Primate societies, dominance, aggression and reproduction in, 459
